3. ESCALATION

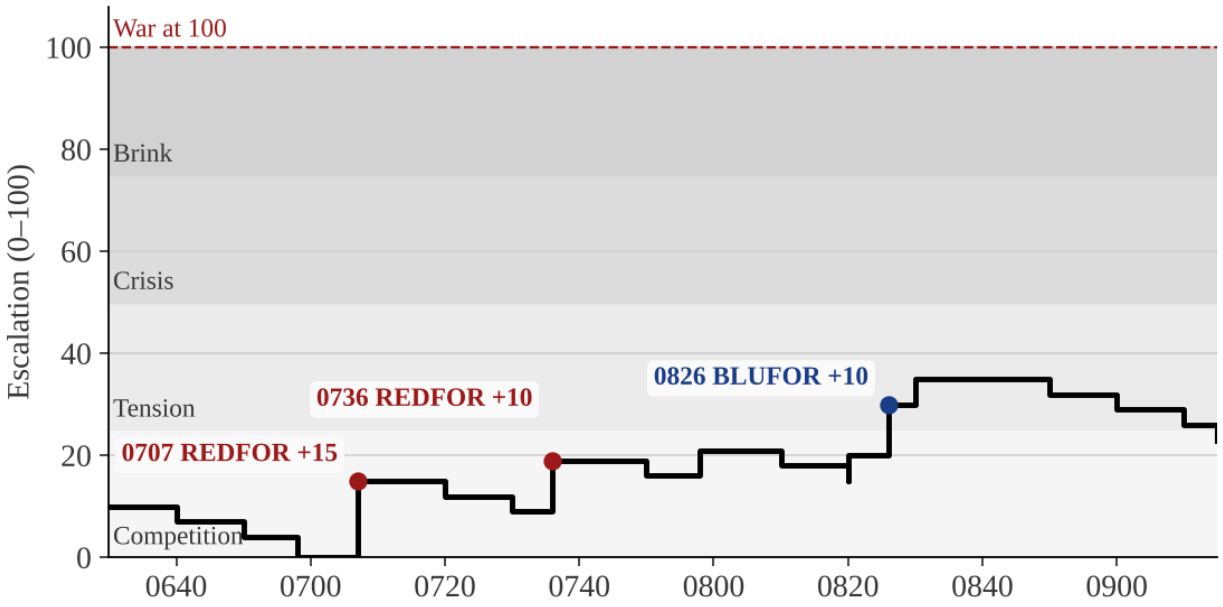

Figure 1. Shared escalation meter over the game. Marked points are single moves worth 10 or more.

Time	Wing	Change	Event
0658	**BLUFOR**	-4	BLUFOR told the truth about the C2 explosion (escalation −5, host nation +5)
0707	**REDFOR**	+15	REDFOR falsely blamed the other wing for the C2 explosion (escalation +15, host nation −10)
0736	**REDFOR**	+10	REDFOR launched a UAV: 4 enemy fireteams located (escalation +10)
0758	**REDFOR**	+5	REDFOR claimed Radar Ridge: contest started (Contest started (+5 escalation). It is yours at 0808 unless BLUFOR defends it.)
0820	**REDFOR**	+5	REDFOR aimed at or crowded the other wing (escalation +5)
0826	**BLUFOR**	+10	BLUFOR launched a UAV: 4 enemy fireteams located (escalation +10)
0830	**BLUFOR**	+5	BLUFOR claimed Fuel Depot: contest started (Contest started (+5 escalation). It is yours at 0840 unless REDFOR defends it.)

With no new escalation, the meter drops 3 at each 10-minute board update; those drops are not listed.

4. POINTS AND HOST-NATION SUPPORT

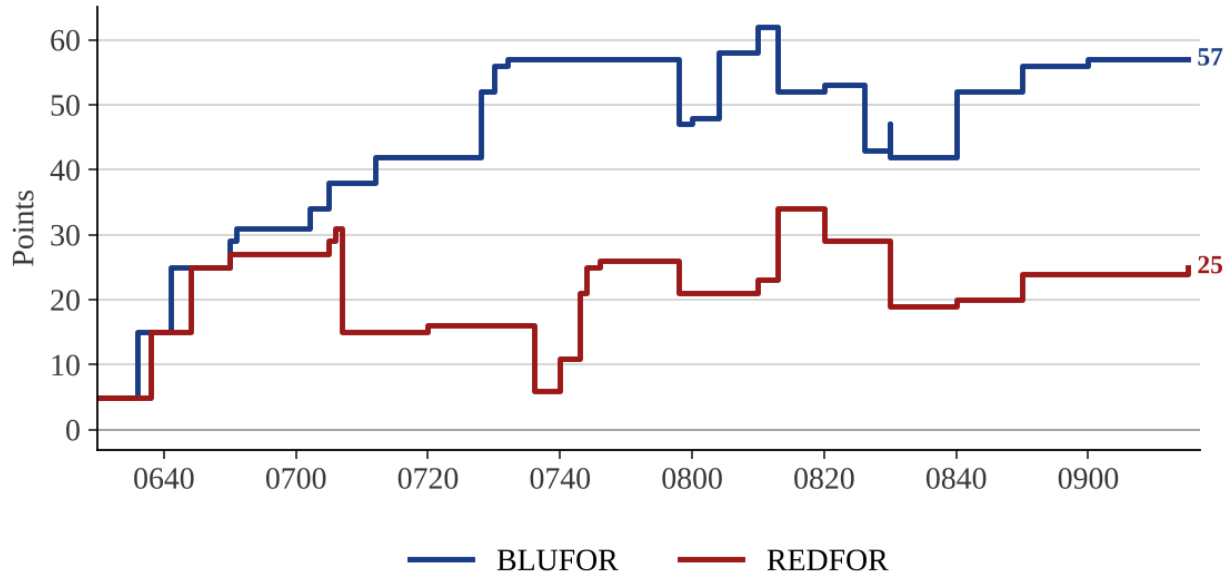

Figure 2. Each wing's points over the game.

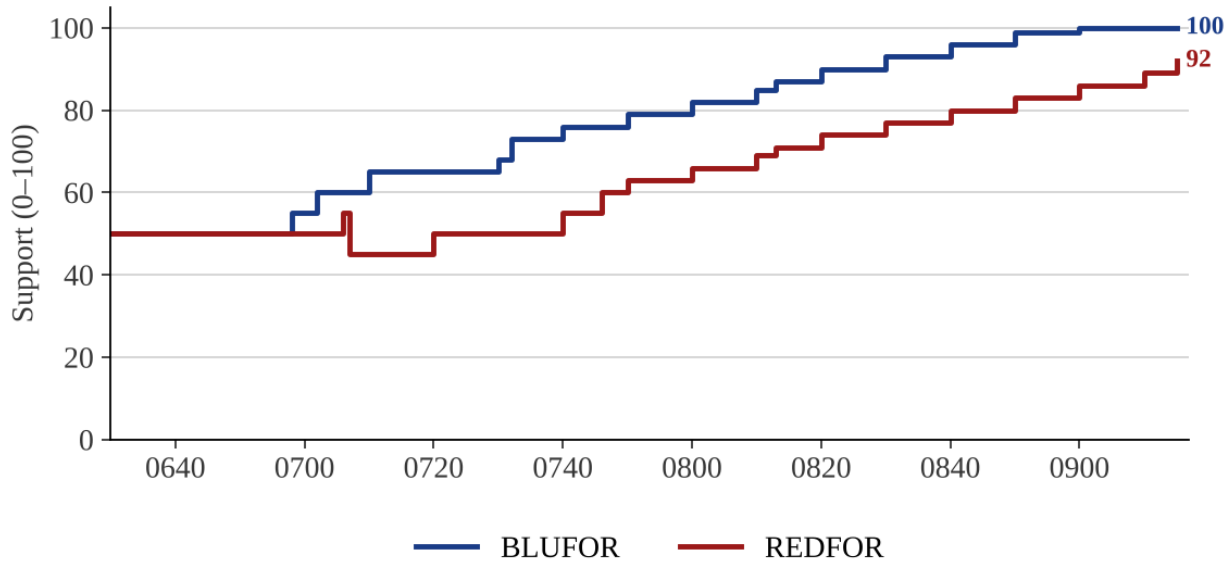

Figure 3. The mayor's support (host-nation meter). Below 20, the mayor closes that wing's town office.

5. SITE CONTROL

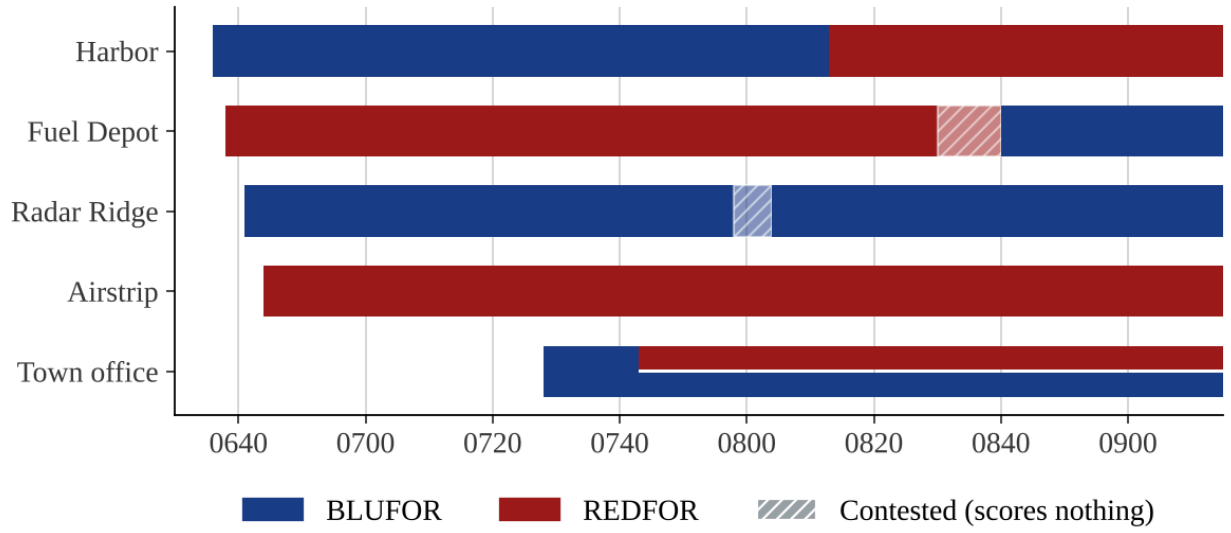

Figure 4. Control of each site over the game. Hatched bars were contested and scored nothing.

6. MANAGING INTELLIGENCE

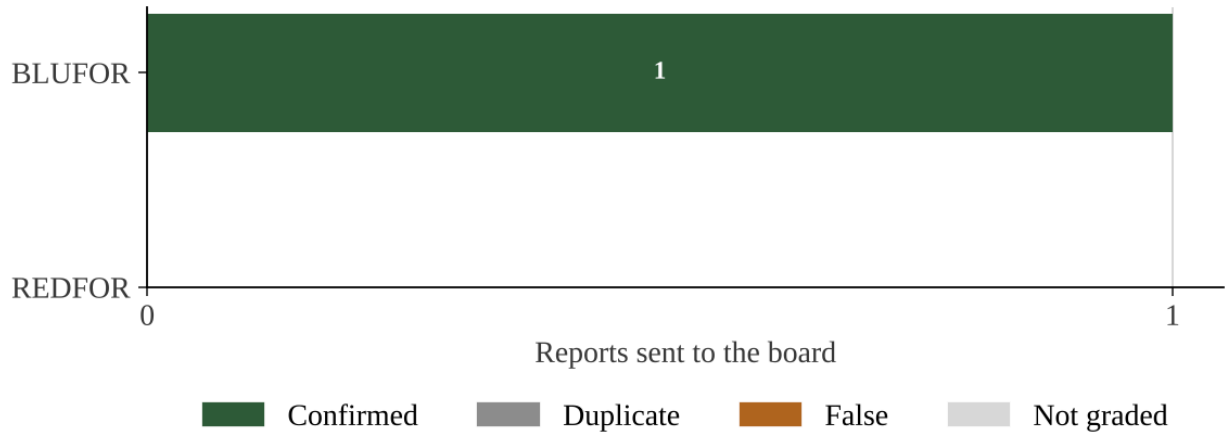

Figure 5. Reports sent to the board and how the white cell judged them.

Wing	Reports	Confirmed	False	Duplicate	Accuracy	Median delay
BLUFOR	1	1	0	0	100%	–
REDFOR	0	0	0	0	–	–

Delay is the time from a team's sighting to the report reaching the board. Accuracy counts only reports the white cell judged.

Each package gave four pieces of intel (HUMINT, SIGINT, IMINT and GEOINT), one of them false or misleading. +2 for the right answer, +2 for spotting the false piece. The window shows when the white cell sent it and when it closed.

7. C2 LIAISON AND DECONFLICTION

The Wing Commanders sent 3 (BLUFOR) and 3 (REDFOR) messages on the liaison channel. Declared sites appear in italics.

0648	**REDFOR**	Agreed for now. Our teams stay east of the town until 0800. *(declared Airstrip until 0800)*
0759	**BLUFOR**	You are on Radar Ridge. That breaks our deal. Pull back now.
0801	**REDFOR**	Your declaration ended at 0800. We will trade: Radar for the Harbor.
0850	**REDFOR**	Rally sectors: we take south and east of the square. *(declared Marala Town until 0910)*

A map-grid check is a report where the team typed its grid from the map and the phone also sent GPS. The error is the distance between the two.

9. DISCUSSION POINTS

BLUFOR Wing Commander

1. Your biggest escalation was at 0826: BLUFOR launched a UAV: 4 enemy fireteams located (escalation +10). What did the Wing Commander know at that moment, who made the call, and was it in your decision table?
2. Escalation cost your wing 15 points in total. Which of those raises bought you something worth it?
3. You correctly said the C2 explosion was caused by the militia. What evidence convinced you?
4. Intel solved 7 of 8 intel packages completely. Package 5 (The north-road device) got no answer before 0744. Who owned it, and what got in the way?
5. Your Wing Commander sent 3 liaison message(s). Which agreement mattered most, and did your teams on the ground keep to it?
6. You finished holding 2 of 4 sites. Which branch of your plan actually got used, and which never came up?

REDFOR Wing Commander

1. Your biggest escalation was at 0707: REDFOR falsely blamed the other wing for the C2 explosion (escalation +15, host nation −10). What did the Wing Commander know at that moment, who made the call, and was it in your decision table?
2. Escalation cost your wing 35 points in total. Which of those raises bought you something worth it?
3. You said "BLUFOR did it" about the C2 explosion, but it was the militia. What was that based on, and who checked it?
4. Intel solved 2 of 8 intel packages completely. On package 2 (Where are the mayor's meetings?) the false piece was the SIGINT report (intercepted cell call). What made Intel trust it, and what should have given it away?
5. Your Wing Commander sent 3 liaison message(s). Which agreement mattered most, and did your teams on the ground keep to it?
6. You finished holding 2 of 4 sites. Which branch of your plan actually got used, and which never came up?
